

ENVIRONMENTAL POLICY

ASMET Sp. z o.o. declares care for environmental protection in the area of its activity and put it on a par with quality requirements of its products and health and safety of employees as an element of harmonious management of the Company.

In order to systematize pro-ecological activities as part of the executed processes we have implemented the requirements of ISO 14001 Environmental Management Systems. Applying requirements and guidelines.

We hereby confirm our will and commitment to prevent environmental pollution during production and auxiliary processes carried out by ASMET in the field of exhaust systems for the automotive industry.

In addition, we declare:

- meeting the requirements of applicable legal regulations,
- continuous improvement of implemented processes and activities affecting the natural environment,
- providing the necessary resources to improve the effectiveness of the Environmental Management System,
- promoting environmental awareness and knowledge among employees,
- informing interested parties about the adopted Environmental Policy.

The guarantee of the Company's improvement in the environmental field is the implementation of the objectives and tasks included in Environmental Management Programs.

Management of ASMET Sp. z o.o. declares full involvement in executing decisions of this Policy and undertakes to meet the requirements, to develop continuously and to improve the Environmental Management System.
